Runnymede

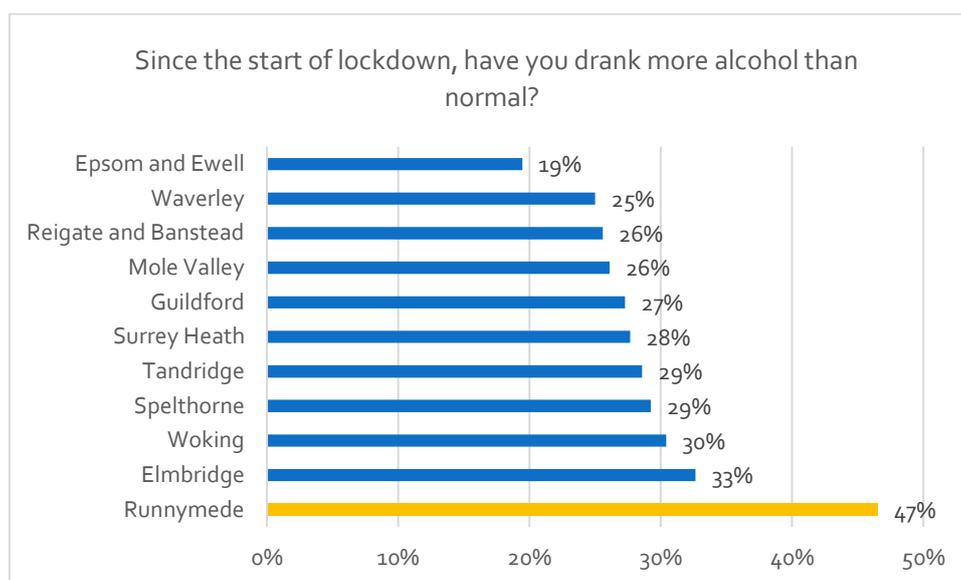

Our data on Runnymede is sourced from the Local Recovery Index (LRI), our Temperature Check survey of 170 households in Runnymede and our Geographical Impact Assessment.

Looking at the period from April to June 2020, the Local Recovery Index (LRI) shows that Runnymede has been the 5th most impacted district and borough in Surrey. Nevertheless, when looking at more local level, some areas such as Thorpe have been disproportionately impacted. Similarly, on themes such as alcohol consumption and diet, Runnymede residents have seen worse outcomes than the Surrey average.

Health

Runnymede ranks 5th for health impact out of the 11 District and Boroughs, with the 7th highest Covid-19 case rate (3 cases per 1,000 residents compared to 3.2 cases per 1,000 residents across Surrey) between April-June 2020.

The Temperature Check survey found that 47% of residents reported drinking more alcohol during lockdown, 18% higher than the Surrey average. 24% reported a negative impact on their diet, compared to 15% across Surrey. Runnymede residents were also 10% more concerned about their family's physical health over the next 6 months than the average Surrey resident.

Economy

For the economic dimension of the LRI Runnymede ranks 10th in the period from April to June 2020. Runnymede also ranks 10th when looking at the percentage of residents furloughed with 31% of eligible jobs furloughed compared to the Surrey average of 28%. Runnymede also ranks 10th for the increase in claimant rate (rising by 52% compared to the Surrey average of 46%)

The Geographical Impact Assessment found certain areas of Runnymede were disproportionately impacted. Thorpe MSOA ranks in the top 5 of MSOAs for economic impacts in Surrey. This driven by a high number of people furloughed (40% compared to an average of 23% of people in Surrey).

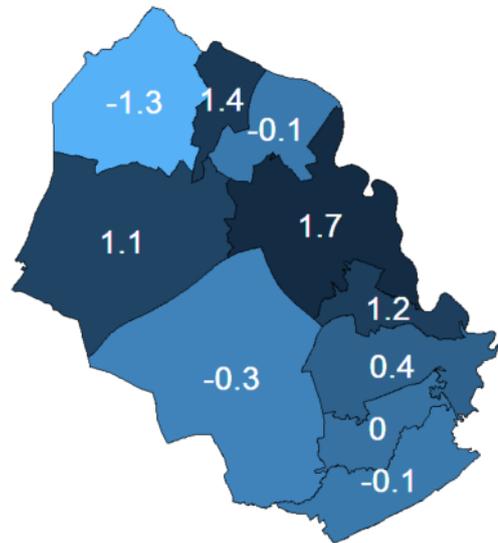

Figure 1 Shows the distribution of Covid Economic Impact across MSOAs in Runnymede (unemployment increases, and people furloughed). A higher score indicates greater impact

The Temperature Check survey also found Runnymede residents were 8% more concerned about their job in the next 6 months than the average Surrey resident. 31% of Runnymede respondents reported coronavirus had a negative impact on their finances, 9% higher than the Surrey average.

Society

Runnymede ranks 9th for the society dimension in the period from April to June 2020, ranking worst for racially motivated crime rate increase (rising from 0.25 incidences per 1,000 people to 0.47 incidences per 1,000 people) and second worst for domestic abuse rate increase (rising from 2 incidences per 1,000 people to 2.4 incidences per 1,000 people).
