

Surrey Covid-19 Community Impact Assessment

Tandridge Impacts

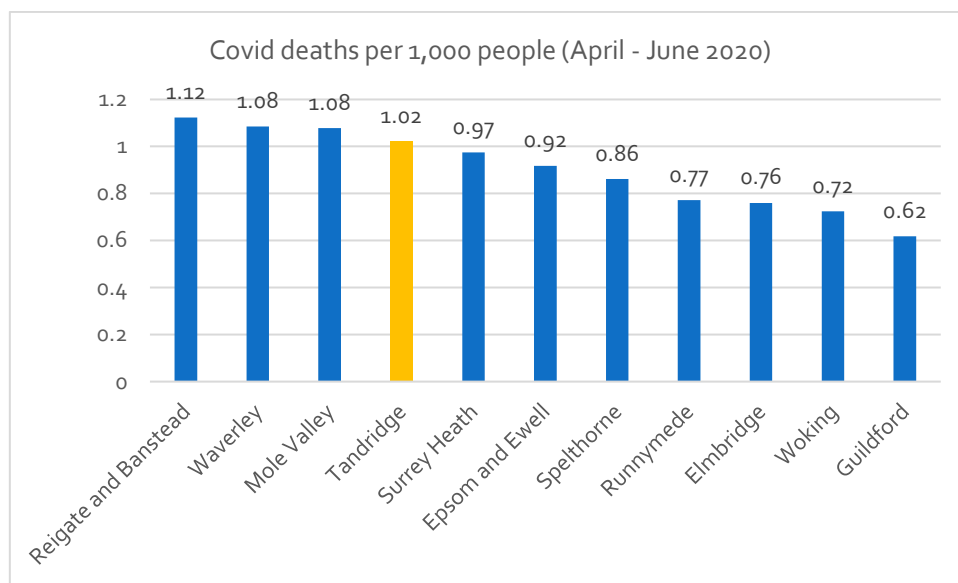

Tandridge

Our data on Tandridge is sourced from the Local Recovery Index (LRI), our Temperature Check survey of 152 households in Tandridge, our Geographical Impact Assessment and ethnographic research in Smallfield and Felbridge.

Looking at the period from April to June 2020, the Local Recovery Index (LRI) shows that Tandridge has been the 6th most impacted district and borough in Surrey. Nevertheless, on themes such as education and health impacts, Tandridge residents have seen worse outcomes than the Surrey average.

Health

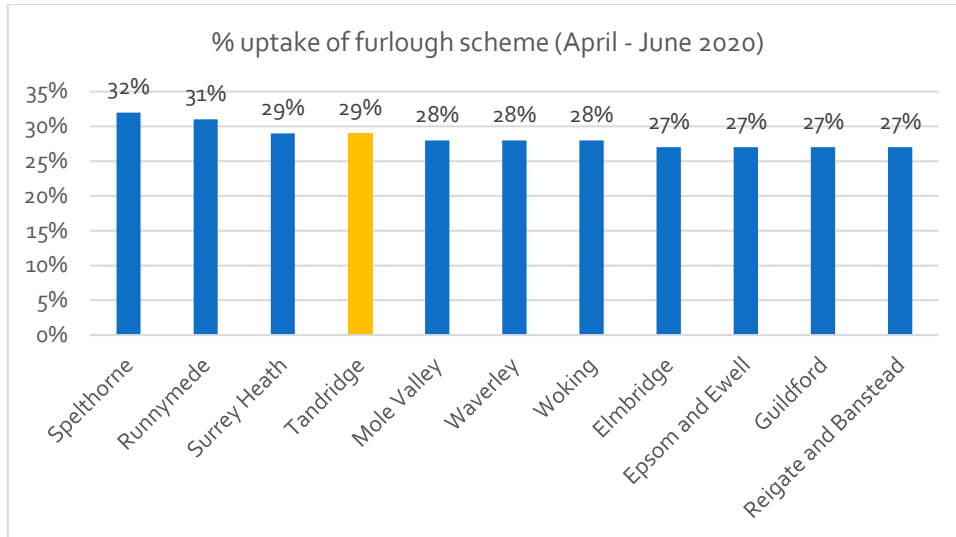

Tandridge ranks 7th for health impacts out of the 11 District and Boroughs, ranking 8th for Covid-19 death rate (1.02 deaths per 1,000 compare to 0.9 deaths per 1,000 across Surrey) between April-June 2020.

The temperature check survey found 27% of households were not confident they would be able to access emergency treatment services during the coronavirus crisis if they needed, compared to 20% of all Surrey residents. Nevertheless, 23% of households in Tandridge also think the pandemic has had only a positive impact on their physical health, 8% higher than the Surrey average.

Economy

For the economic dimension of the LRI Tandridge ranks 2nd least impacted in the period from April to June 2020, however 8th for the percentage of residents furloughed with 29% of eligible jobs furloughed compared to the Surrey average of 28%. Tandridge ranks 7th for claimant rate (rising by 48% compared to the Surrey average of 46%).

70% of Tandridge households say they have been working from home full time since the coronavirus pandemic, 11% higher than the Surrey average.

Society

Tandridge ranks 7th for the society dimension in the period from April to June 2020, but 9th for point change in racially motivated crime (rising by 0.18 incidences per 1,000 people, while numbers across Surrey remained static).

Tandridge residents were 10% more likely to report that coronavirus has had only a negative impact on education, with 59% of applicable households reporting this. These concerns were echoed in the ethnographic research which found that rural residents felt separated from the wider impacts of Covid-19 in their 'safe rural bubbles,' and were frustrated at continual restrictions. Tandridge residents were 7% less concerned about having access to open spaces than the Surrey average.
